To determine your insurability, the Insurer named above (the Insurer) has requested that you provide a sample of your blood and/or other bodily fluid for testing and analysis. All tests will be performed by a licensed laboratory.

Unless precluded by law, tests may be performed to determine the presence of antibodies or antigens to the Human Immunodeficiency Virus (HIV), also known as the AIDS virus. The HIV antibody test that we perform is actually a series of tests done by a medically accepted procedure. The HIV antigen test directly identifies AIDS viral particles. These tests are extremely reliable. Other tests which may be performed include determinations of blood cholesterol and related lipids (fats) and screening for liver or kidney disorders, diabetes and immune disorders.

All test results will be treated confidentially. They will be reported by the laboratory to the Insurer. When necessary for business reasons in connection with insurance, you have or have applied for with the Insurer, the Insurer may disclose test results to others such as its affiliates, reinsurers, employees or contractors. If the insurer is a member of the Medical Information Bureau (MIB, Inc.), and if the test results for HIV antibodies/antigens are other than normal, the Insurer will report to the MIB, Inc., a generic code which signifies only a nonspecific test abnormality. If your HIV test is normal, no report will be made about it to the MIB, Inc. Other test results may be reported to the MIB, Inc., in a more specific manner. The organizations described in this paragraph may maintain the test results in a file or data bank. There will be no other disclosure of test results or even that the tests have been done, except as may be required or permitted by law or as authorized by you.

If your HIV test results are normal, no routine notification will be sent to you. If the HIV test results are other than normal, the Insurer will contact you. The Insurer may also contact you if there are other abnormal test results which, in the Insurer's opinion, are significant. The Insurer may ask you for the name of a physician or other health care provider to whom you may authorize disclosure and with whom you may wish to discuss the results.

Positive HIV antibody/antigen test results do not mean that you have AIDS, but that you are at significantly increased risk of developing AIDS or AIDS-related conditions. Federal authorities say that persons who are HIV antibody/antigen positive should be considered infected with the AIDS virus and capable of infecting others. For those reasons, a person with a positive test result may wish to consider further independent testing.

Positive HIV antibody or antigen test results or other significant blood abnormalities will adversely affect your application for insurance. This means that your application may be declined, that an increased premium may be charged, or that other policy changes may be necessary.

## Notification of Test Results

A positive test result will be disclosed to a physician or other individual you designate. If you do not designate anyone, a positive test result will be disclosed to you. However, because a trained person should deliver that information so that you can understand clearly what the test result means, please list your private physician so that the Insurer can have him or her tell you the test result and explain its meaning.

If you desire further information about AIDS, the meaning or HIV-related test results and the availability and location of HIV-related counseling services, you may call the New York State Department of Health on their toll-free number 1-800-541-AIDS.

## Consent

I have read and I understand this Notice and Consent for AIDS-related Testing. I voluntarily consent to the withdrawal of blood and/or other bodily fluids from me, the testing of that blood and/or other bodily fluids, and the disclosure of the test results as described herein.
